

1 Test

Exemple de block de code pour présenter du YAML

docker-compose.yml

```
1 version: '3.1'
2 services:
3   c1: # Client 1
4     build:
5       context: .
6       dockerfile: Dockerfile.client
7     container_name: arret03-c1
8     environment:
9       - MYNAME='c1'
10      - MYSERVER='s1'
11     volumes:
12       - './tmp_todo/todo'
13     networks:
14       - arret03
15     ports:
16       - '8080:8080'
17     tty: true
18
19 networks:
20   arret03:
```

docker-compose.yml

```
1 while true; do
2   liste | wc -l > tmp.txt;
3   clear;
4   cat tmp.txt;
5   sleep 1;
6 done
```
